HXF SERIES STRAIGHT VALVE

GENERAL

The H-1300 Series is a moderate-pressure instrumentation flow-regulating needle valve. It is generally used for instrumentation panels, sampling systems and accurate applications.

The valves are compact in size and structure and offer reliable low and moderate flow regulation with long service life.

CLEANING & PACKAGING

HAM-LET H-1300 Metering Valve is treated with HAM-LET Passivation Cleaning and Packaging (Procedure 8075).

HAM-LET H-1300 Ball valves with face-seal end connections are treated with Oxygen Cleaning and Packaging (Procedure 8075).

TESTING

The H, HF and HXF Series metering valve designs have been tested for Proof and Burst.

Every H, HF & HXF-1300 metering valve is factory tested for proper assembly, using leak detection.

FLOW SETTING

H-1300 series metering valve is tested for bubble tight shut-off at 100 psig (6.8 bar) differential pressure.

HF-1300 series metering valve handle dead stop is set at 4 to 10 std cm³/min with 5 psig (0.34 bar) inlet pressure.

HXF-1300 series metering valve handle dead stop is set at 4 to 10 std cm³/min with 15 psig (1.0 bar) inlet pressure.
